WHY CHOOSE THIS PROGRAMME?

The introduction of a whole range of digital devices and processing software, together with new aesthetic materials and powerful manufacturing and prototyping tools, is radically transforming the dental profession. The evolution of digital technology and computer-aided design/computer-aided manufacture systems is creating exciting opportunities for improving oral and dental healthcare.

Practical Workshops

As part of the course, you will be exposed to unique practical training, benefiting from the experience of performing procedures on simulated models.

Clinical Training

You will be exposed to clinical training in our state-of-the-art dental hospital in Central Birmingham, where digital procedures are undertaken by expert academics and specialists.
(AIMS & OBJECTIVES)

This unique course is dedicated entirely to the fascinating field of digital dentistry. You will learn the scientific and clinical applications of digital dentistry in all dental specialties. You will be exposed to unique practical training where digital procedures are undertaken by expert academics and specialists.

WHO IS IT FOR?

This course is aimed at dental professionals who are interested in the world of digital dentistry.

LEARNING OPTIONS

Masters of Science (MSc) in Digital Dentistry
Distance Learning

Length of course: 18 months
180 UK credits

This course is delivered entirely online; you will be able to attend synchronous and recorded seminars on our advanced virtual learning platform. The practical sessions are also recorded, and the relevant materials are sent to you for you to complete the procedures in your practice.

Masters of Science (MSc) in Digital Dentistry
Blended Learning (Part Time)

Length of course: 18 months
180 UK credits

There are two options for completing your clinical training. The first option involves two intensive week-long residential schools in each stage of the course at our College in Central Birmingham. These sessions will only cover clinical aspects of the course ensuring that you are confident in your hands-on abilities.

The second option is for students who are able to travel to College more often and consists of three full days a month (spread over nine months) and involves a mix of practical and clinical sessions.

Flexibility to exit with a Post-Graduate Certificate (PG-Cert) or Post-Graduate Diploma (PG-Dip) in Digital Dentistry.

ENTRY REQUIREMENTS:

Distance Learning and Blended Learning Applicants

- Undergraduate Degree in Dentistry, and
- Applicants will need to demonstrate evidence of professional indemnity cover, and
- Health clearance to be able to perform clinical practice, and
- Current evidence of satisfactory DBS check
- Dental Care Professionals with a degree at level 6 (therapists, hygienists and dental technology graduates)

English Language Requirements

Our courses require a minimum English level of IELTS 6.0 or equivalent, with no band score under 5.5. If you do not meet the English language requirement we will give you a conditional offer subject to you meeting the requirement before the commencement of the course.
